

Exploring SEER Treatment Data

Ted Trimble, M.D., M.P.H.

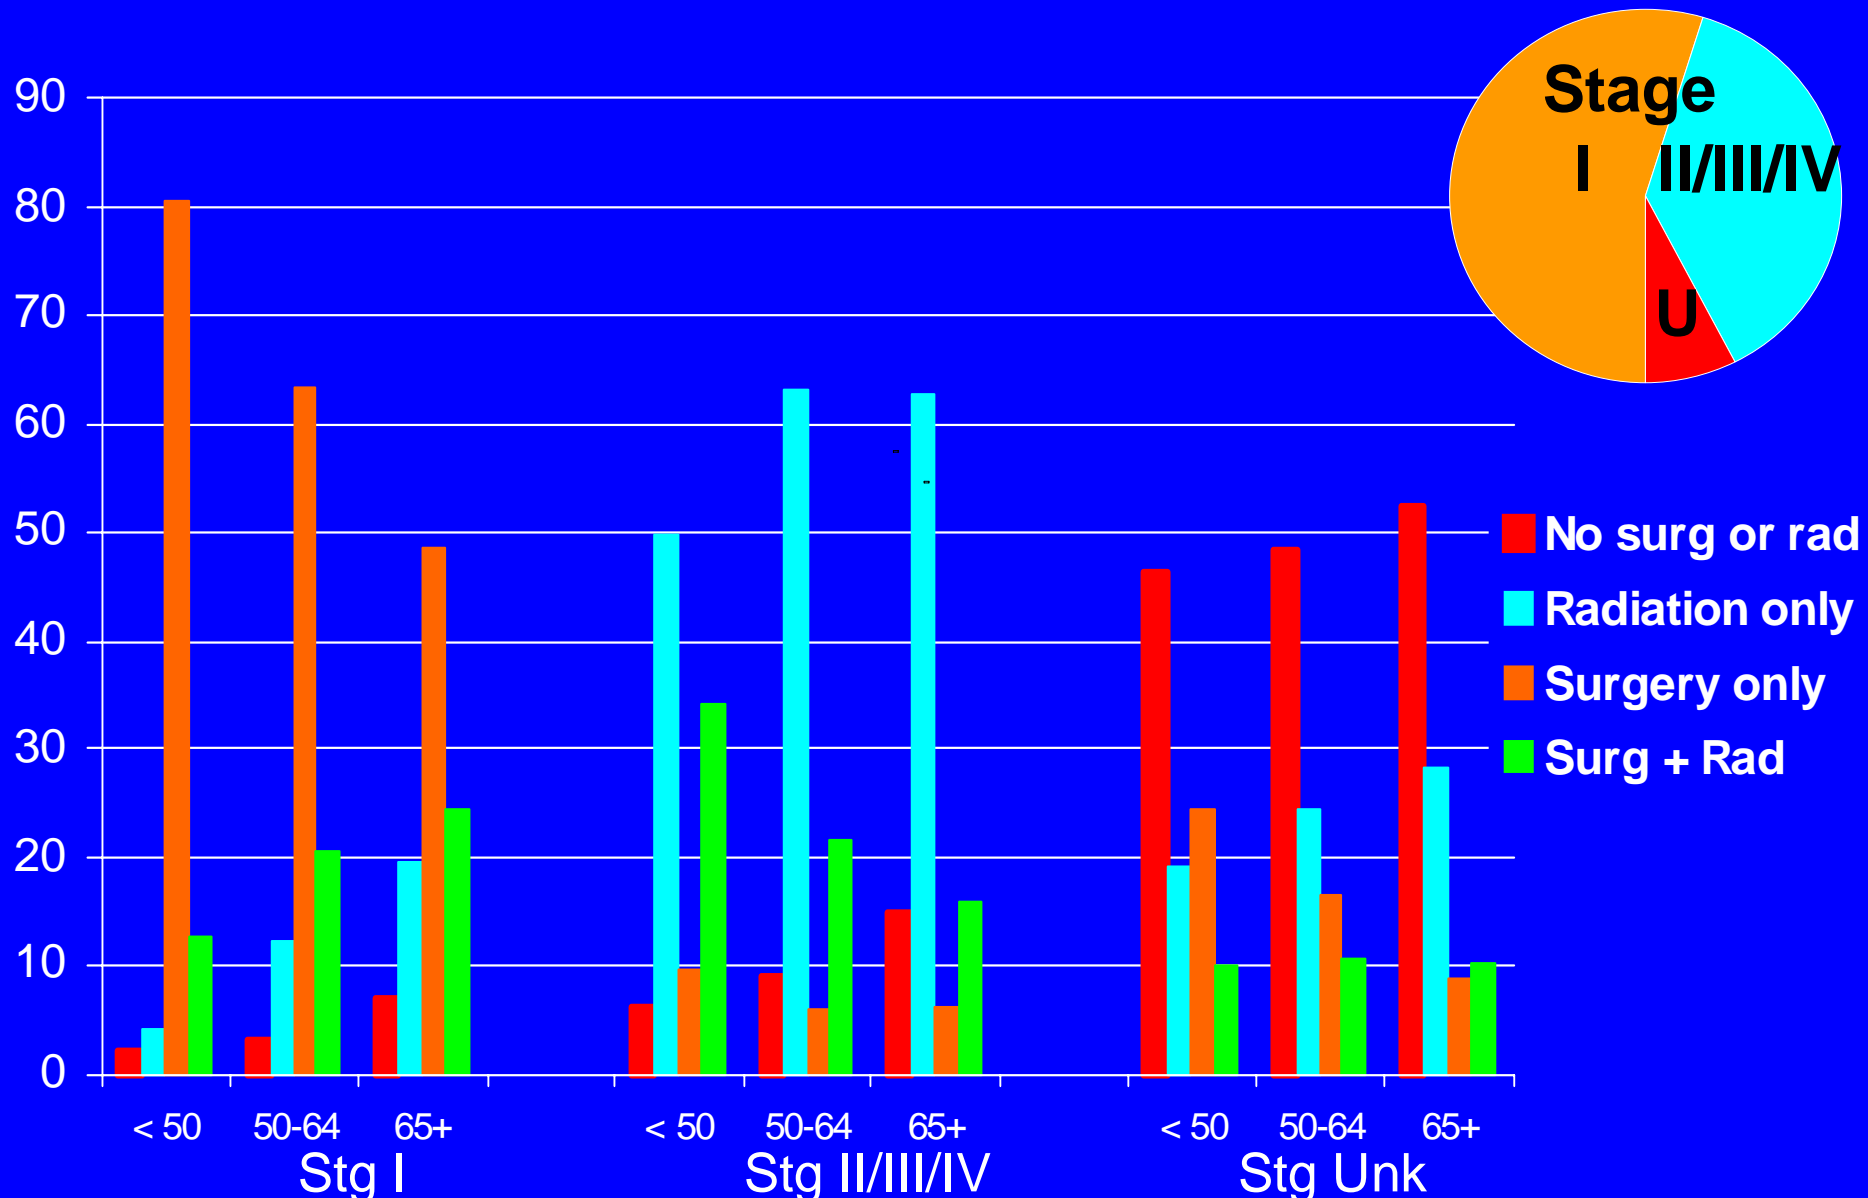

**NCI Division of Cancer
Treatment & Diagnosis**

November 28, 2001

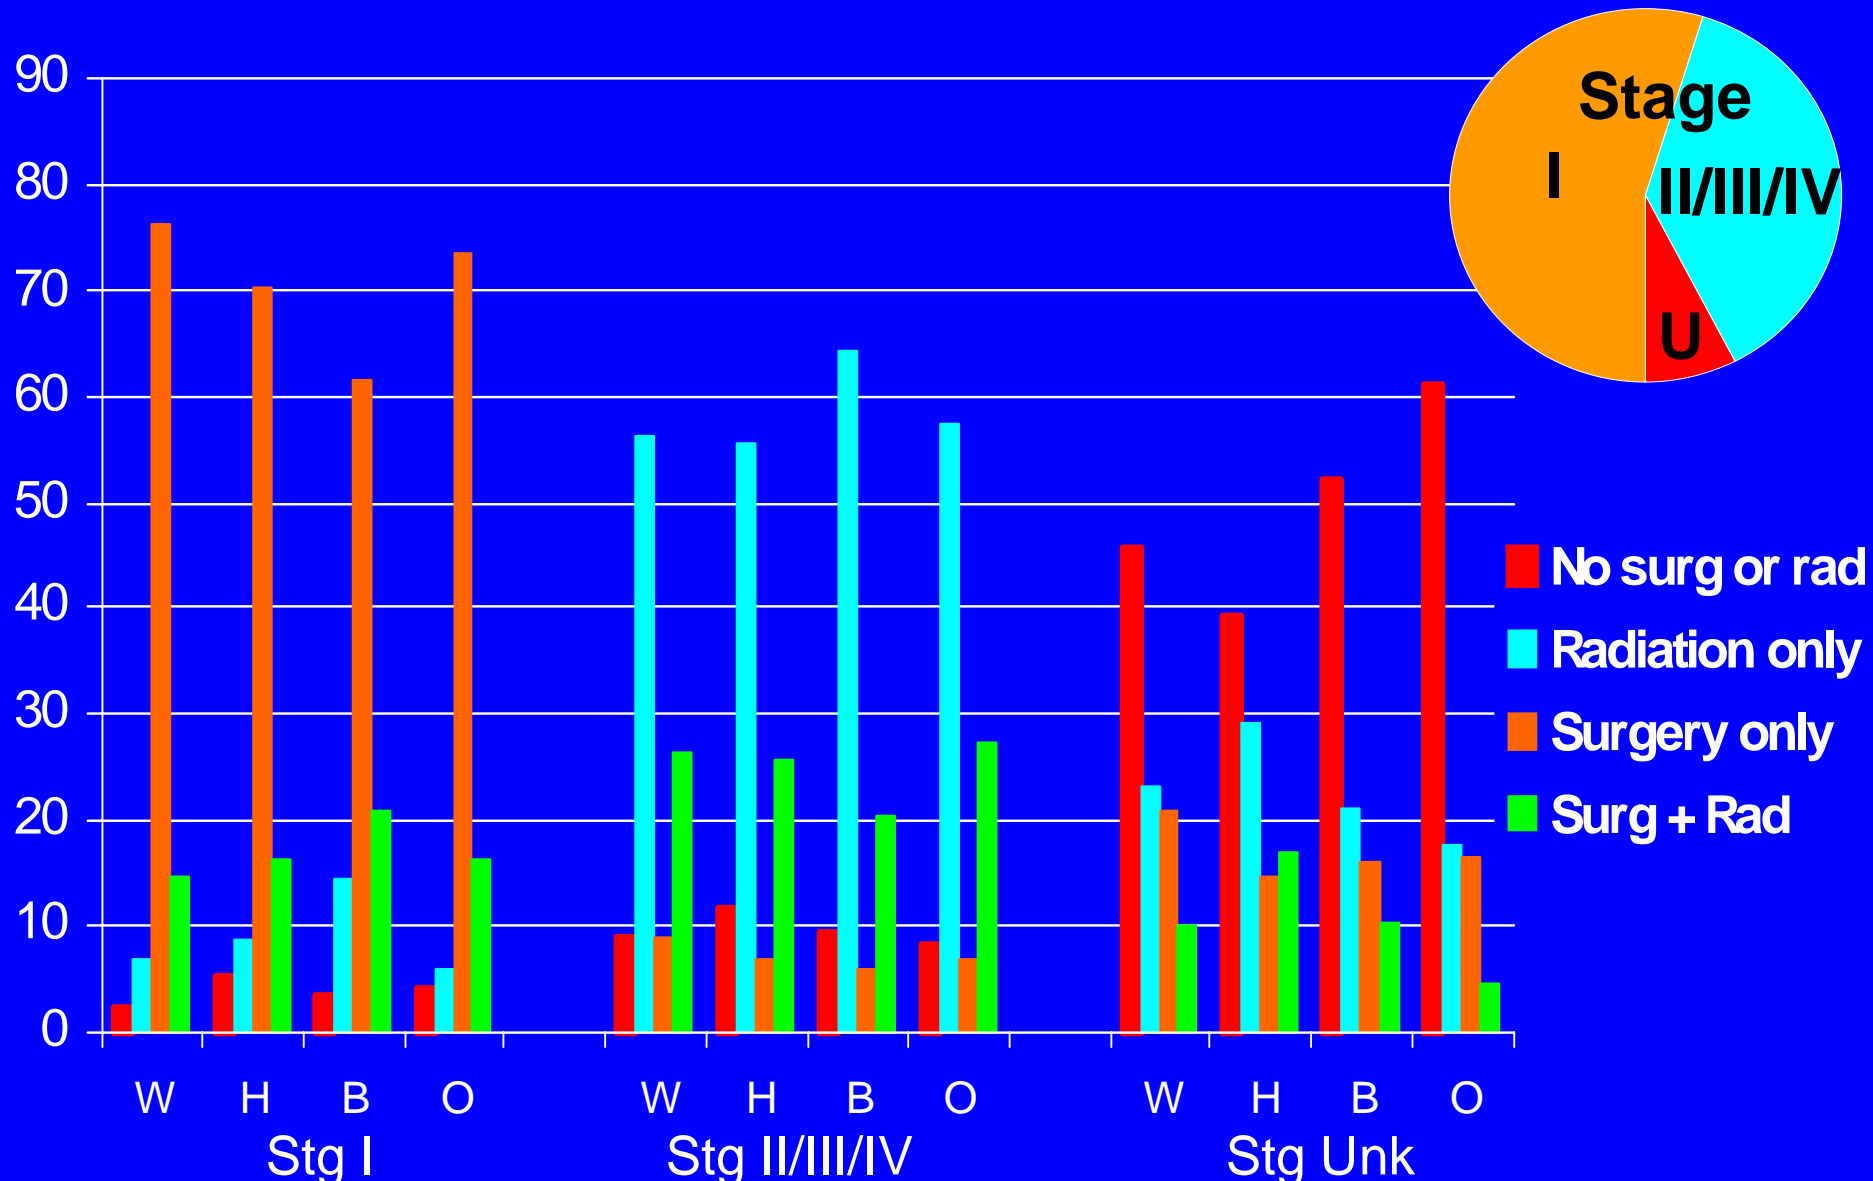

Issues in treatment

- Is treatment available?
- What is the quality of treatment?
- Do patients adhere to treatment recommendations?

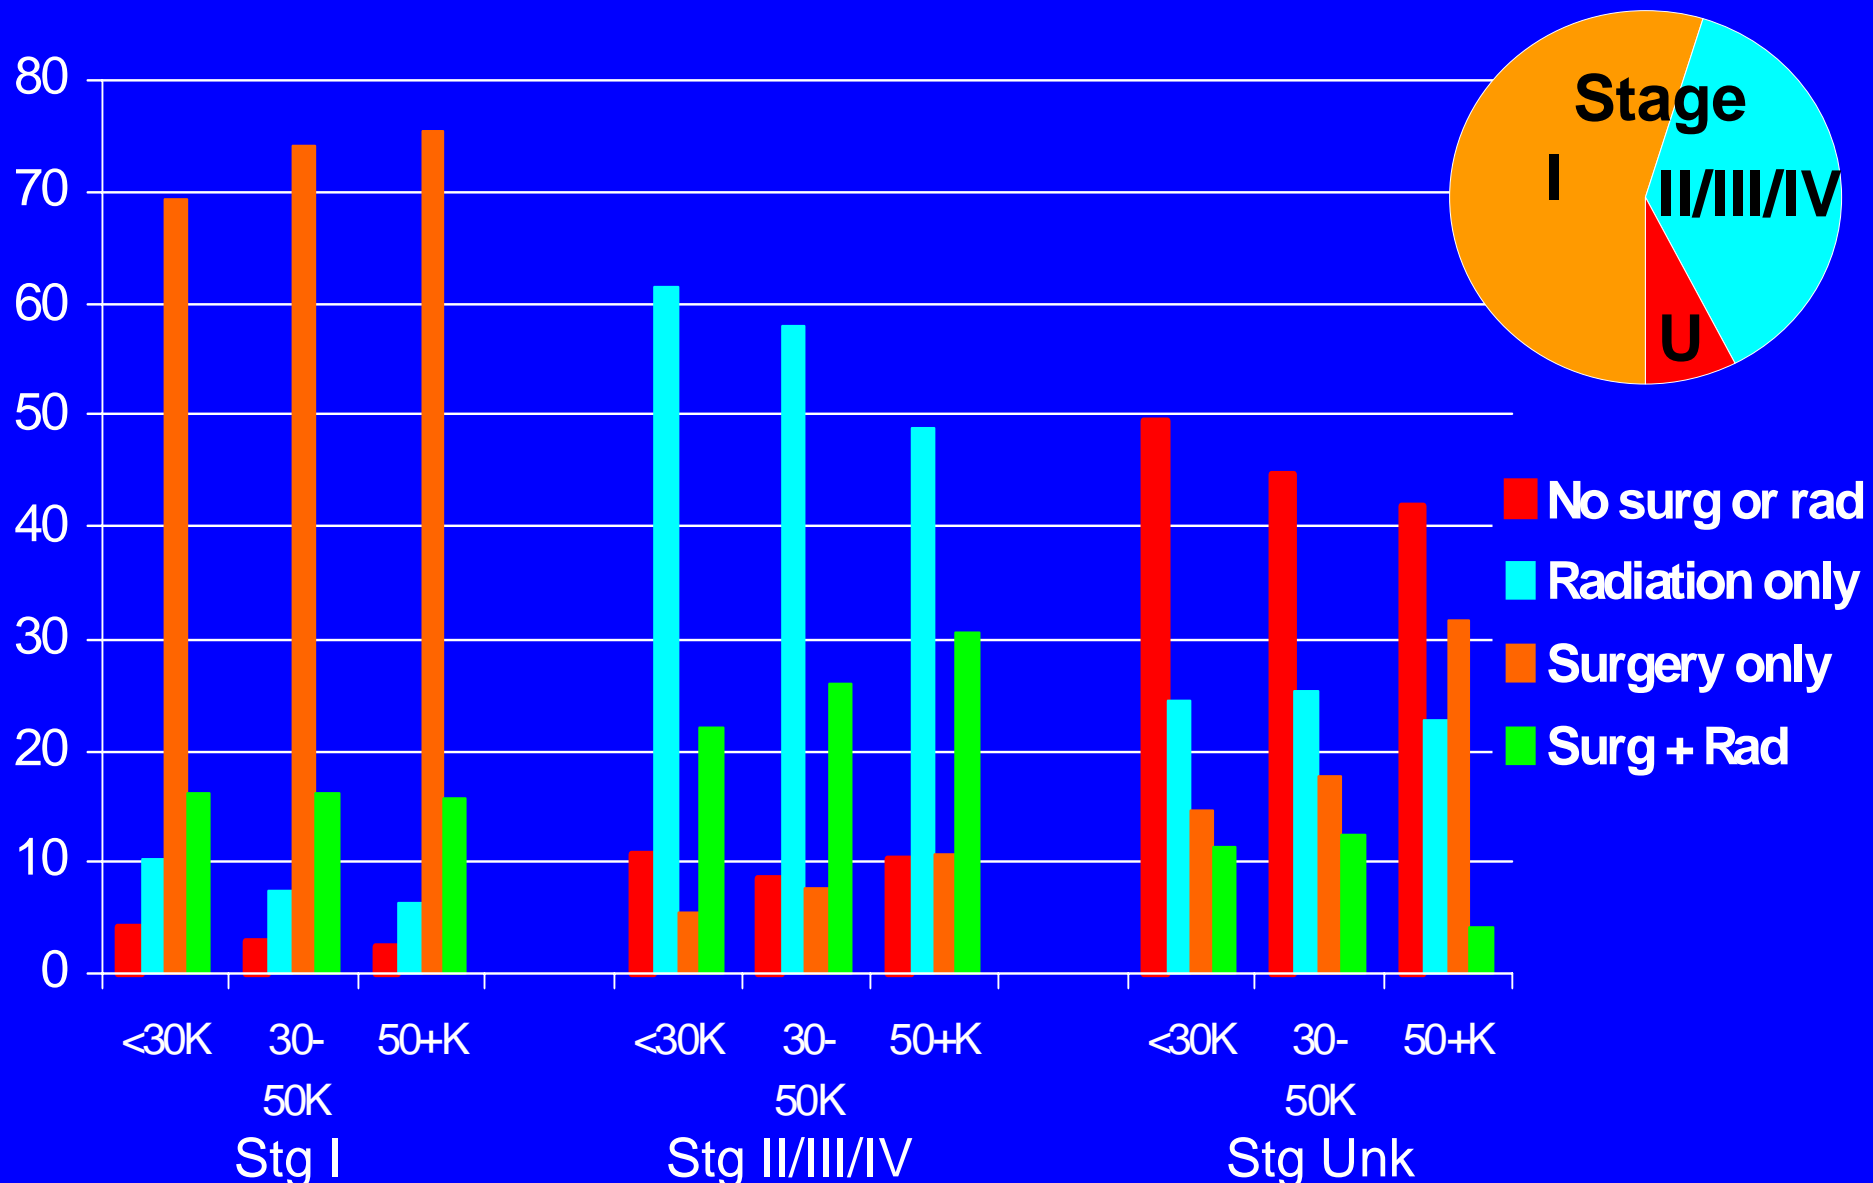

Treatment for Cervical Cancer by Age and Stage at Diagnosis 1992-1997 SEER

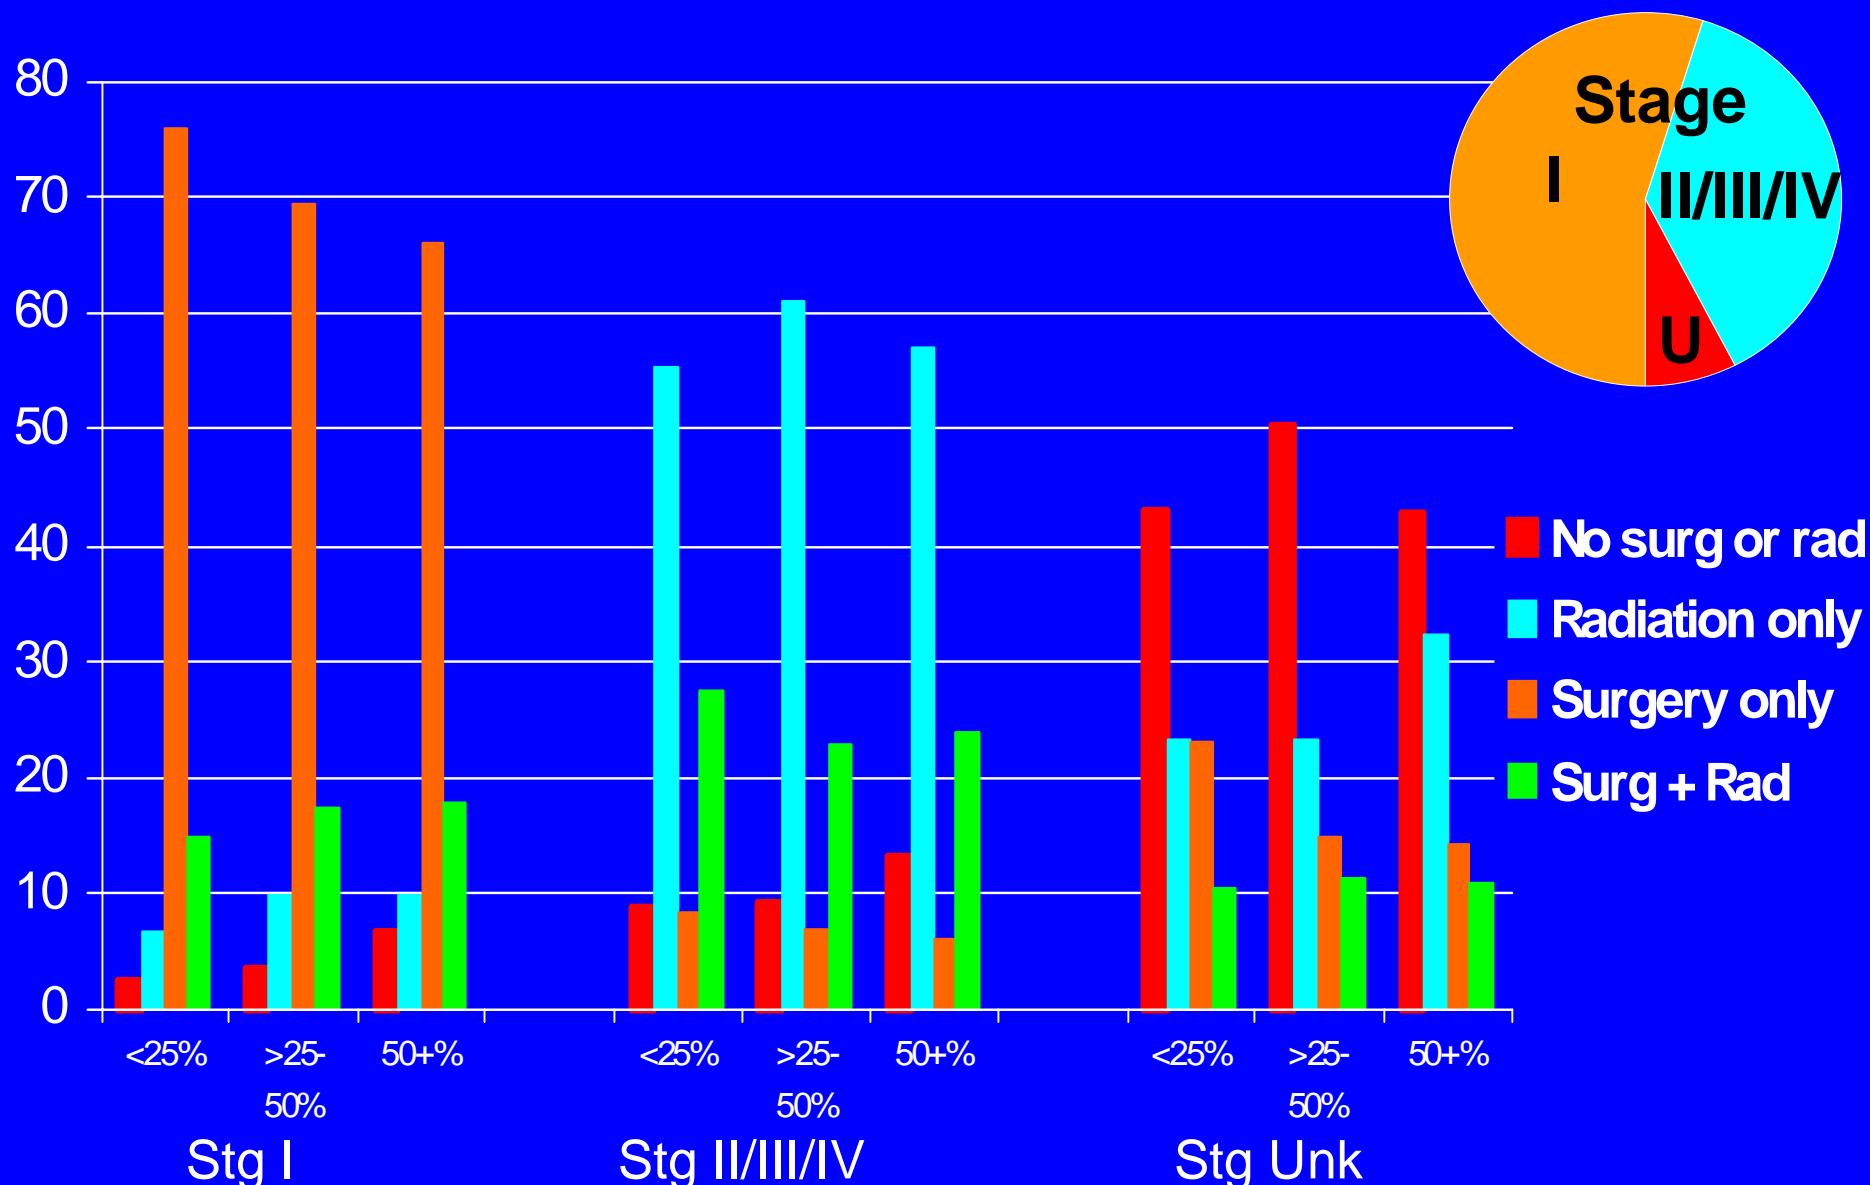

Treatment for Cervical Cancer by Race and Stage at Diagnosis 1992-1997 SEER

Treatment for Cervical Cancer by Median Income and Stage at Diagnosis 1992-1997 SEER

Treatment for Cervical Cancer by Percent with No High School Diploma and Stage at Diagnosis 1992-1997 SEER

SEER data

- Overall, 5% of patients do not receive treatment
- Women older than age 65 years with advanced disease are more likely not to have treatment
- We have not data on treatment availability, quality, or adherence.
